

PODAR INTERNATIONAL SCHOOL, DAVANAGERE

MESSAGE FROM PRINCIPAL

Circular: Nursery to Grade 10

Date: 4 April 2026

Subject: Nurturing Our "Temple of Learning" Together

From: The Office of the Principal

To: The Valued Parents of PIS Davanagere

Dear Parents and Members of our Podar Family,

Since the moment I stepped into the vibrant town of Davanagere, I have been deeply impressed by its positive energy and the sensible, logical, and convincing thoughts of the parents I have had the privilege to meet. I have truly fallen in love with this community and its people.

As we embark on this journey together, I wish to share my vision for our school—not as a "boss," but as a **servant** committed to the success of every child.

Embracing the Child

At PIS Davanagere, we choose to accept children as children. Let us together:

- Embrace their **imperfections** and their **failures** as stepping stones to growth.
- Accept the **childishness**, the **purity**, and the **innocence** in every child.
- Celebrate the **uniqueness** of every individual.

At times, a child may use words they do not fully understand. In our family, we will not judge them; instead, we will gently correct them with love.

Our goal is simple: I want to see the laughter and a genuine smile on the face of every child, teacher, and staff member in our campus throughout the day.

The Fertile Land and the Seed

In education, the "**Soil**" is just as important as the "**Seed**." To a farmer, the harvest is guaranteed only if the land is fertile. In our campus:

- **The Soil:** Our teachers, staff, didis, drivers, and security team.
- **The Seed:** Your precious children.

As your Principal, I am working determinedly to prepare this ground, ensuring it is fertile, safe, and nurturing so that **our "seeds"** can grow to their **fullest potential**.

A Design Thinking Approach

Every family has its **imperfections**, and our **"Second Family"** at PIS Davanagere is no exception. I do not ask you to simply "bear" with these imperfections; instead, **I seek your partnership in correcting them.**

I believe in a **Design Thinking, Problem-Solving Approach**. I invite remedies and solutions rather than a blame game. My door is always open to every parent family member who wishes to offer constructive corrections that help us move forward.

School's Growth = Children's Growth

Our Milestones and Commitment

The Podar **curriculum is vibrant and holistic**, and I am heartened to see the high regard you hold for it. To ensure we are living up to these standards, we have set a clear goal:

- **100% Student & Staff Happiness:** By September 2026, we will conduct a comprehensive "Vibe Survey" to ensure that 100% of our children, teachers, and support staff love coming to this **Temple of Learning** every single day.

We will work relentlessly until we reach this goal, and once achieved, we will work even harder to retain it for all time.

Thank you for being our **partners in this beautiful mission**. **Your support is the water that will help our garden bloom.**
