ADVISORY

Safe Mode of Transportation for Students

Dear Parents,

The safety and well-being of our students is of utmost importance to us. It has been observed that some students are travelling to and from school through modes of transportation that may not always be safe or appropriate for their age.

Parents are requested to carefully review and ensure the safety arrangements for their ward's daily commute.

Parents are advised to note the following:

1. **E-Rickshaws and Auto-Rickshaws:** The school has serious concerns regarding the use of **e-rickshaws and auto-rickshaws for transporting students**, as these modes of transport may not always provide an adequate level of safety for school-going children. Instances of **overcrowding, unsafe seating arrangements and inadequate supervision** can significantly increase the risk to students. Parents are therefore strongly advised to **avoid using such modes of transportation for their ward's daily commute**, particularly where the safety and authorised supervision of the child cannot be ensured.
2. **Two-Wheelers:** Since school-going children may be minors and may not be legally eligible to ride a two-wheeler independently, parents are strongly advised not to allow their ward to commute to school on their own bike or scooter.
3. **Accompaniment by Another Person:** Students should not be sent to school or allowed to travel with an **unauthorised, unknown or unverified person**. Parents must ensure that the person accompanying or picking up their ward is responsible and authorised by the family.
4. **Use of Safety Equipment:** Where applicable, appropriate safety measures, including the use of helmets on two-wheelers, must be ensured.
5. **Change in Transportation Arrangement:** Parents are requested to inform the school whenever there is a significant change in their child's regular mode of transportation or the person authorised to pick up the child.
6. **School Transport:** Parents are encouraged to use safe and reliable transportation arrangements and may opt for the **school transport facility**, subject to availability.

We request all parents to take these concerns seriously and make informed decisions regarding their ward's daily commute. While the school continues to take necessary measures to ensure student safety within its premises and through authorised school transport, **the safety arrangements for a student's commute through privately arranged transportation remain an important responsibility of parents and guardians.**

Your cooperation in ensuring the safe travel of every child is highly appreciated.

Regards,

Principal
