

"Home Place" was a project for grade 2. The project aimed at studying the various Home places for different habitat basically desert region, Snow region, Water, Land diversity.

The ISA activity was divided into four sub activities as follows:

### Activity I

The topic began with a reading of a story book named 'I took a walk by Henry Cole'. This gave an idea to the students about the topic. While reading Science teacher introduced the topic to them, English teacher guided them how to find difficult words by using a dictionary and ICT teacher made them aware of how to use computer for reading a book.

### Activity II

Teacher conducted a role-play where all the students participated with great energy. The Narrator started with an introduction. All the other students were dressed up as different animals. They enacted the drama and conveyed the message of "Saving Habitat."

### Activity III

Students were divided into different groups to make models of different Habitat. Students were engaged in the group activity which gave them a hand on experience.

### Activity IV

Students were asked to make a scrap book by sticking the pictures of different animals and plants found in different habitat.

**Conclusion:** Overall it was a very good experience for all the students and teachers together which definitely helped the students to become more confident and responsible. ISA has given us a new platform to work with schools across the globe. Hence cultural understanding , international activities would be a part of our curriculum for this academic year along with the global issues, cultural diversity and conflict solving solutions to think globally in order to produce 'Good' and 'Responsible' Global Citizens.
